### DESCRIPTION:

The M4 16T hydraulic beavertail low loader offers the customer a heavy duty low loader to transport machinery up to 16 tonnes payload. The configuration of this trailer allows it to be hydraulically transformed from a beavertail low loader to an 8m long flatbed trailer easily by utilising the tractors hydraulics.

Transforming from a high capacity low loader trailer into a good sized heavy duty bale trailer is easy without the need of a cumbersome bale wedge. All these features in addition to the usual M4 trailer spec's, four wheel braking, sprung axles and drawbar, LED lights etc etc.. together with the M4 build quality and strength making it the most versatile best built multipurpose agricultural low loader on the market!
